# CVC 123

# **INTENDED USE**

RNA Medical<sup>®</sup> Brand **CVC 123** *Calibration Verification Controls* are assayed quality control materials used for confirming the calibration and linearity of blood gas, electrolyte, and metabolite instrumentation. This product may be used on stand-alone blood gas analyzers or any combination blood gas, electrolyte, and metabolite system. When used as a supplement to instrument calibration, daily QC procedures, preventative maintenance, and proper record keeping, CVC 123 will contribute to the laboratory's overall quality assurance program.

CVC 123 may be used to:

- Check analyzer linearity
- Troubleshoot analyzer problems
- Document proper calibration
- Confirm preventative maintenance
- Assist with regulatory compliance

# **PRODUCT DESCRIPTION**

CVC 123 is a buffered aqueous solution containing electrolytes, glucose, and lactate. It has been equilibrated with specific levels of oxygen, carbon dioxide, and nitrogen. This product contains no preservatives and no biological materials.

CVC 123 is provided in convenient, ready-to-use ampuls containing 2.5 mL of solution. It is a five (5) level product with four (4) ampuls of each level in each kit. CVC 123 values cover the clinically significant range of instrument performance for pH,  $pCO_2$ ,  $pO_2$ , Na<sup>+</sup>, K<sup>+</sup>, Cl<sup>-</sup>, Ca<sup>++</sup>, Mg<sup>++</sup>, glucose, and lactate for documenting reportable range. For optimal performance, use of one (1) kit per analyzer is recommended.

# STORAGE AND SHELF LIFE

CVC 123 has a shelf life of thirty-six (36) months from the date of manufacture when stored at 2-8 °C. It may be stored at room temperature (up to 25 °C) for nine (9) months, not exceeding the stated expiration date. This product should be protected from freezing and exposure to temperatures greater than 30 °C.

# CONTROL VALUES AND ANALYTES

Lot specific values are provided with each box of controls. The typical target values for CVC 123 are as follows:

| Analyte                   | Low Value |   | High Value |
|---------------------------|-----------|---|------------|
| pH                        | 6.85      | - | 7.80       |
| $pCO_2$ (mmHg)            | 15        | - | 87         |
| $pO_2$ (mmHg)             | 22        | - | 465        |
| Na <sup>+</sup> (mmol/L)  | 90        | - | 170        |
| K⁺ (mmol/L)               | 1.6       | - | 11.3       |
| Cl <sup>-</sup> (mmol/L)  | 70        | - | 135        |
| Ca <sup>++</sup> (mmol/L) | 0.25      | - | 3.10       |
| Mg <sup>++</sup> (mmol/L) | 0.15      | - | 2.20       |
| Glucose (mg/dL)           | 0         | - | 450        |
| Lactate (mmol/L)          | 0.7       | - | 17.0       |

## **CVC 123 SPECIFICATIONS**

| Packaging:  | 5 levels (4 ampuls per level), 2.5 mL per ampul |
|-------------|---|
| Storage:    | 2-8 °C (up to 9 months at room temperature)     |
| Shelf Life: | 36 months from date of manufacture              |
| Matrix:     | Buffered aqueous solution                       |
|             |   |

Analytes: pH, pCO<sub>2</sub>, pO<sub>2</sub>, Na<sup>+</sup>, K<sup>+</sup>, Cl<sup>-</sup>, Ca<sup>++</sup>, Mg<sup>++</sup>, glucose, lactate

# **DIRECTIONS FOR USE**

The basic steps for running CVC 123 are outlined below. Refer to the package insert for specific instructions.

- 1. Calibrate the instrument as directed by the manufacturer.
- 2. Sample each of the Level 1 ampuls until three (3) replicates are completed. Test Levels 2, 3, 4, and 5 the same way.
- 3. Record the results on the Data Collection and Linearity Worksheets included in the kit.
- 4. Calculate the mean value for each test analyte and compare it to the range on the Expected Values Chart.
- 5. Using the graphs provided, plot the test result against the expected result. Connect the points to visualize linearity.

Note: Steps 3, 4, and 5 may be performed on-line as a feature of PeerQC<sup>®</sup> described below.

# PEERQC® STATISTICAL ANALYSIS

Available at www.RNAMedical.com, PeerQC provides web-based graphing and reporting for RNA Medical's Calibration Verification Controls. This easy-to-use service eliminates time-consuming manual data calculation and hand linearity graphing.

Specific features of PeerQC include:

- Instant data calculation and analysis
- Peer comparison data in real-time
- Printable graph and detailed report for each analyte
- Report download for archiving

# **ORDERING INFORMATION**

Please specify this catalog number when ordering RNA Medical CVC 123 Calibration Verification Controls.

# Catalog number: CVC 123

# **ADDITIONAL PRODUCTS**

RNA Medical offers a full line of blood gas and CO-Oximetry controls, calibration verification materials, capillary blood collection tubes, and quality control materials for various point-of-care tests. For further information about CVC 123 or any other RNA Medical product, please call us or visit our website at: www.RNAMedical.com.

RNA Medical is a registered trademark and PeerQC is a registered service mark of Bionostics, Inc., Devens, MA, USA.
